HAWA EBRAHIM HAMID

AI/ML Engineer | Generative AI, RAG & Machine Learning

Addis Ababa, Ethiopia • +251 991 864 954 • hawaebrahimhamid@gmail.com • LinkedIn: linkedin.com/in/hawa-ebrahim-hamid •
GitHub: github.com/hawaebrahimhamid

SUMMARY

AI/ML Engineer with hands-on experience building and deploying Generative AI, RAG, computer vision, and machine learning applications using Python. Developed a financial RAG assistant, AI-powered Telegram data pipeline, and Bayesian time-series analysis application, combining retrieval, model workflows, data processing, APIs, testing, and deployment.

TECHNICAL SKILLS

Programming:	Python, SQL, JavaScript
Generative AI:	RAG, LLMs, Text Embeddings, Sentence Transformers, Prompt Engineering
Machine Learning:	YOLOv8, PyMC, scikit-learn, Machine Learning Workflows
Retrieval & NLP:	FAISS, Vector Search, Semantic Retrieval, Text Processing
Data:	Pandas, NumPy, PostgreSQL, ETL, Data Warehousing
APIs & Applications:	FastAPI, Flask, Streamlit, REST APIs
Engineering:	Git, GitHub, Docker, GitHub Actions, pytest, Automated Testing

EXPERIENCE

AI & Machine Learning Engineer — Project-Based May 2026 – Present | Addis Ababa / Remote

Completed the Kifiya AI Mastery Program in 2026 and continue building practical AI, machine learning, and software applications through project-based engineering work.

- Build AI/ML applications using Python, SQL, RAG, LLMs, data processing, machine learning workflows, and REST APIs.
- Develop solutions involving text embeddings, vector retrieval, backend services, computer vision, and data pipelines.
- Apply Git/GitHub, Docker, automated testing, CI/CD, and cloud deployment practices across AI/ML projects.

Full-Stack Developer — Independent Software Projects 2024 – Present | Addis Ababa / Remote

- Develop Python and JavaScript applications integrating REST APIs, databases, data-processing workflows, and interactive interfaces.
- Build and integrate backend services, databases, third-party services, and AI/data-processing components into complete applications.
- Use Git/GitHub and cloud deployment platforms to develop, test, and deploy software projects.

SELECTED PROJECTS

CrediTrust Complaint Assistant — Financial RAG System

Live Demo: creditrust-complaint-chatbot.streamlit.app | GitHub: github.com/hawaebrahimhamid/rag-complaint-chatbot

- Built and deployed a financial RAG assistant for customer complaint analysis using Sentence Transformer embeddings, FAISS vector retrieval, Top-K search, and LLM generation.
- Implemented text preprocessing, chunking, source attribution, answer-quality validation, and evidence-grounded fallback handling to improve response grounding.
- Added automated tests and GitHub Actions CI to validate core RAG application behavior.

Medical Telegram Warehouse & AI Pipeline

GitHub: github.com/hawaebrahimhamid/medical-telegram-warehouse

- Built an end-to-end AI/data pipeline that ingests Telegram messages and product images, applies YOLOv8 object detection and confidence scoring, and stores enriched results in PostgreSQL.
- Implemented rule-based image-content categorization and dbt transformations to produce structured, analysis-ready warehouse models.
- Developed FastAPI analytical endpoints and used Dagster to orchestrate ingestion, database loading, transformation, and image-processing workflows.

Brent Oil Change Point Analysis Dashboard

Live Demo: brent-oil-dashboard.vercel.app | GitHub: github.com/hawaebrahimhamid/brent-oil-change-point-analysis

- Implemented Bayesian change-point analysis using PyMC to identify structural changes in historical Brent crude oil prices.
- Built a React and Flask application that exposes analytical results through REST APIs and presents them through an interactive dashboard.
- Integrated statistical analysis, backend APIs, and frontend visualization into a deployed end-to-end application.

EDUCATION

Kifiya AI Mastery Program (KAIM 9) | 10 Academy — Completed 2026 | Remote

Intensive engineering fellowship focused on Generative AI, Machine Learning Engineering, Data Engineering, RAG Systems, Data Warehousing, MLOps, and Full-Stack Development. Awarded with distinction upon completion.

BSc in Geology | Bahir Dar University — 2020 – 2023

LANGUAGES

Amharic — Native | English — Professional Working Proficiency
