HAWA EBRAHIM HAMID

Full-Stack Engineer | React, Next.js, Node.js, Python & REST APIs

Addis Ababa, Ethiopia • +251 991 864 954 • hawaebrahimhamid@gmail.com • LinkedIn: linkedin.com/in/hawa-ebrahim-hamid •

GitHub: github.com/hawaebrahimhamid

SUMMARY

Full-Stack Engineer with hands-on experience building and deploying web applications, REST APIs, database-backed systems, and data-driven products using React, Next.js, Node.js, Python, Flask, and PostgreSQL. Experienced in responsive interfaces, backend services, authentication, API integrations, payment workflows, and AI-enabled applications using modern software engineering practices.

TECHNICAL SKILLS

Frontend:	React, Next.js, JavaScript, HTML, CSS
Backend:	Node.js, Express, Python, Flask, FastAPI, REST APIs
Databases:	PostgreSQL, MySQL, Firestore, SQL
Authentication & Integrations:	Firebase Authentication, Stripe, Axios, CRUD
AI & Data:	RAG, LLMs, FAISS, Sentence Transformers, Pandas, PyMC
Engineering:	Git, GitHub, Docker, GitHub Actions, pytest, Automated Testing
Deployment:	Vercel, Netlify, Render, Streamlit

EXPERIENCE

Full-Stack Developer | **Independent Software Projects** 2024 – Present | Addis Ababa / Remote

- Build and deploy full-stack web applications using React, Next.js, JavaScript, Node.js, Express, Python, Flask, REST APIs, and databases.
- Develop responsive user interfaces, backend services, authentication, API integrations, and database-backed features across web applications.
- Integrate third-party services and deploy applications using Git/GitHub and cloud platforms, with automated testing and practical software engineering workflows.

AI & Machine Learning Engineer — **Project-Based** May 2026 – Present | Addis Ababa / Remote

Completed the Kifiya AI Mastery Program in 2026 and continue building project-based AI, machine learning, and software applications.

- Build AI/ML solutions using Python, SQL, RAG, LLMs, data engineering, and REST APIs.
- Develop applications involving embeddings, vector retrieval, backend APIs, and machine learning workflows.
- Apply Git/GitHub, Docker, automated testing, CI/CD, and cloud deployment across projects.

SELECTED PROJECTS

Amazon Clone — Full-Stack E-commerce Application

GitHub: github.com/hawaebrahimhamid/Amazon-Clone

- Built and deployed a full-stack e-commerce application using React, Firebase Authentication, Firestore, and React Context.
- Implemented product browsing, category navigation, shopping cart, protected orders, and checkout functionality.
- Developed Firebase Cloud Functions with Express and Stripe PaymentIntents for server-side payment processing.

Medical Telegram Warehouse & AI Pipeline

GitHub: github.com/hawaebrahimhamid/medical-telegram-warehouse

- Built a Python/FastAPI backend that processes Telegram channel data and exposes REST APIs for product search, channel activity, message search, and visual-content reporting.
- Designed a PostgreSQL data warehouse using SQLAlchemy, with dbt staging and mart models for structured, analysis-ready datasets.
- Integrated Swagger API documentation and Dagster orchestration for data ingestion, database loading, transformation, and image-processing workflows.

Brent Oil Change Point Analysis Dashboard

Live Demo: brent-oil-dashboard.vercel.app | GitHub: github.com/hawaebrahimhamid/brent-oil-change-point-analysis

- Built and deployed an interactive analytics dashboard using React, Flask, Python, and PyMC.
- Developed REST API endpoints for KPIs, price data, change points, and events, connecting backend analysis with the React frontend.
- Implemented Bayesian change-point analysis and integrated analytical results into an interactive web interface.

EDUCATION

BSc in Geology | Bahir Dar University 2020 – 2023

PROFESSIONAL TRAINING

Kifiya AI Mastery Program (KAIM 9) | 10 Academy Completed 2026 | Remote

Intensive engineering fellowship focused on Generative AI, Machine Learning Engineering, Data Engineering, RAG Systems, Data Warehousing, MLOps, and Full-Stack Development.
Awarded with distinction upon completion.

LANGUAGES

Amharic — Native | English — Professional Working Proficiency
